TURNER RESIDENCE

The formal indoor pool at the Turner Residence recalls the grandeur of the turn of the last century when guests would gather in their swimming costumes for mid-day cocktails and an exchange of witticisms.

The New Abbey Limestone carries this elegance with aplomb; its subtle variation creating intra-stone movement that supports the scene without ever upstaging the hostess. Walking surfaces and pool copings received a light sandblast finish to keep the gathering safe and injury free while walls,

columns and moldings were hand-dressed to a honed but non-reflective surface. This allows the refracted light to warm, rather than bounce from the stone to those who enjoy the splendor of the pool and environs.
